Webinar Best Practices

To optimize Dr. Ann's webinars for motivating and educating your employees, she suggests the following best practices:

- Take advantage of group viewings whenever possible. Allowing your employees to watch the webinars together leverages the positive spirit and energy of “group dynamics” and enhances comradery, while fostering a culture of wellness in your workplace.
- Be sure you appropriately introduce Dr. Ann to the webinar viewers prior to the broadcast. Knowledge of her reputation and credibility as an esteemed expert in nutrition and wellness who is fun, totally real, and contagiously inspirational will increase the audience's receptiveness and interest. (We will provide a short bio as well as a brief Dr. Ann promo video for this purpose.)
- Encourage employees to watch the webinars on their own repeatedly as needed for additional motivation and reinforcement. The bottom line: the more they watch them- the better!
- To optimize engagement, be aggressive in promoting the webinars. Take advantage of every avenue at your disposal (email, printed flyers, calendars, employee newsletters, etc.) and of course incentivize viewing as your organization sees fit.
- Lunch and learns are an ideal context for group viewings. If you take advantage of this popular educational forum, be sure that the lunch you serve is consistent with the information in the webinars. A free lunch can be a great incentive to bring employees in!
- Be sure to make the companion handout(s) for the webinar easily accessible for your employees. For group viewings, having them pre-printed and available in their seats is optimal. If they will be posted electronically, be sure to let everyone know exactly where they can be accessed.
- Use Dr. Ann's Eat Right for Life books or her Weigh Less for Life book (all available to employers through WELCOA for a steep discount) as the ideal incentive gift or the perfect companion “take away” to reinforce the webinar content. Dr. Ann's books and webinars are definitely synergistic with one another. She has specifically constructed both to be used in concert.

Webinar Best Practices

- Encourage your employees to utilize the full suite of free educational resources on Dr. Ann's website, especially her e-newsletter and her Make It Happen Monday Video Tips. They will all serve to further your employee's learning and understanding, keep them motivated, and remind them of Dr. Ann's encouraging voice.
- For group viewings of her multi-part webinars (Eat Right for Life, Weigh Less for Life, and The Happiness Diet) we suggest viewing anywhere from 1 week to 4 weeks apart, but most any viewing schedule can be utilized.
- If there are time constraints for individuals or group viewings of the webinars, keep in mind that any webinar can be stopped at any point and subsequent viewing resumed exactly where previously stopped. In other words, the user has complete control to start and stop the webinar video wherever and whenever they want.
- If you want to track your individual employee viewings, it is easy for your IT personnel to install a sign-in box on the webinar viewing page for this purpose. If this is not feasible or possible, talk to Dr. Ann about a good alternative she can make available.
